The Hearts and Hands Clinic, Inc. is a non-profit organization founded in 2009. Our mission and purpose is to promote health and wellness by providing primary medical, dental, and vision services for the adult citizens of Bulloch County who are medically uninsured and whose income is at or below 200% of the federal poverty guideline. Our purpose is not one of enabling, but to serve the community by providing support for individuals as they seek ways to better themselves. Together we take our hearts and use our hands to inspire by giving hope.
